MACHIMURA FARM

MACHIMURA FARM

"Ebetsu is an agricultural region that grows crops with great potential, has many excellent farmers, and has one of the best flour, noodle and meat processing food manufacturers in Hokkaido. The land in this area is excellent, and there are many things to do. The future will be even more interesting." In this Ebetsu area, Machimura Farm seems to be exploring "a new model of suburban rural areas based on agriculture." In the process, the concept of "soil, grass and cattle" that grew together with the local area is still passionate.
